Journal of Cellular Plastics

Subject and Title Index *Vol. 10 / 1974*

Air Flow Effect
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Appliances
Urethanes in the Seventies, *Mar./Apr., p. 78*

ASTM 1692
The Role of Silicone Surfactant in Flexible Polyurethane Foams of Low Burn Extent, *July/Aug., p. 186*

Automotive
Urethanes in the Seventies, *Mar./Apr., p. 78*

Automotive Seating
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Auto Seatpads
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Bayer-Berichte #31 1973
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Bayer Publication # PU/H 51002
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Blowing Agents
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Catalysts
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Chemical Bonds
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Coatings, Urethane
Urethanes in the Seventies, *Mar./Apr., p. 78*

Cold Cure Foam
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Compression
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Compression Set
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Compressive Modulus
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*

Compressive Strength
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Construction
Urethanes in the Seventies, *Mar./Apr., p. 78*

Cushioning
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

Deformation
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Design
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept./Oct., p. 230*

Diafoams
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

Dynamic Behavior
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Edition 1.1. 1972
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Elastomers
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*
Urethanes in the Seventies, *Mar./Apr., p. 78*

Elastomer Sheets
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

End Group Analysis
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*

Energy Absorption
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

English Edition
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Firm Impact Cushions
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Flame Retarded Foam
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Flammability
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Flex Fatigue
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Flexible Foam
Correlation Between Hardness Tests on Flexible Polyurethane Foam, *Jan./Feb., p. 35*
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Flexible Urethane Foam
Advances in Flexible Slabstock Urethane Foam Production Technology, *Sept./Oct., p. 221*
Urethanes in the Seventies, *Mar./Apr., p. 78*
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Flexural Rigidity
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept./Oct., p. 230*

Foam
Polymer-Polyols in the Development of High Resiliency Foam, *Nov./Dec., p. 276*

Foamed Materials
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Foamed Polyester Fibers
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Journal of Cellular Plastics

Subject and Title Index *Vol. 10 / 1974*

Air Flow Effect
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Appliances
Urethanes in the Seventies, *Mar./Apr., p. 78*

ASTM 1692
The Role of Silicone Surfactant in Flexible Polyurethane Foams of Low Burn Extent, *July/Aug., p. 186*

Automotive
Urethanes in the Seventies, *Mar./Apr., p. 78*

Automotive Seating
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Auto Seatpads
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Bayer-Berichte #31 1973
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Bayer Publication # PU/H 51002
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Blowing Agents
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Catalysts
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Chemical Bonds
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Coatings, Urethane
Urethanes in the Seventies, *Mar./Apr., p. 78*

Cold Cure Foam
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Compression
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Compression Set
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Compressive Modulus
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*

Compressive Strength
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Construction
Urethanes in the Seventies, *Mar./Apr., p. 78*

Cushioning
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

Deformation
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Design
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept./Oct., p. 230*

Diafoams
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

Dynamic Behavior
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Edition 1.1. 1972
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Elastomers
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*
Urethanes in the Seventies, *Mar./Apr., p. 78*

Elastomer Sheets
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

End Group Analysis
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*

Energy Absorption
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

English Edition
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Firm Impact Cushions
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Flame Retarded Foam
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Flammability
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Flex Fatigue
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Flexible Foam
Correlation Between Hardness Tests on Flexible Polyurethane Foam, *Jan./Feb., p. 35*
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Flexible Urethane Foam
Advances in Flexible Slabstock Urethane Foam Production Technology, *Sept./Oct., p. 221*
Urethanes in the Seventies, *Mar./Apr., p. 78*
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Flexural Rigidity
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept./Oct., p. 230*

Foam
Polymer-Polyols in the Development of High Resiliency Foam, *Nov./Dec., p. 276*

Foamed Materials
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Foamed Polyester Fibers
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Foamed Thermoplastics
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept./Oct., p. 230*

Foam Shelters, Temporary
Mobay/Bayer Temporary Foam Shelters, *Sept./Oct., p. 217*

Footwear
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Formulation-Property Relationships
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Furniture
Urethanes in the Seventies, *Mar./Apr., p. 78*

Gel Point
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Hardness Tests
Correlation Between Hardness Tests on Flexible Polyurethane Foam, *Jan./Feb., p. 35*

HCN Generation
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

Heat Deflection
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

High Resiliency Foam
Polymer-Polyols in the Development of High Resiliency Foam, *Nov./Dec., p. 276*

Impact Hysteresis
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

Isonate® 225
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Isocyanates
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Isocyanurate Foams (Polyisocyanurate Foams)
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

L-5710 Silicone Surfactant
The Role of Silicone Surfactant in Flexible Polyurethane Foams of Low Burn Extent, *July/Aug., p. 186*

Low Burn Extent
The Role of Silicone Surfactant in Flexible Polyurethane Foams of Low Burn Extent, *July/Aug., p. 186*

Machinery, Foam
Mobay/Bayer Temporary Foam Shelter, *Sept./Oct., p. 217*

Markets
Urethanes in the Seventies, *Mar./Apr., p. 78*

Mattress Cushions
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Mechanical Behavior
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*

Mechanical Properties
Mechanical Properties and Characterization of Phenolic Resin Syntactic Foams, *Sept./Oct., p. 237*
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

Microballoon
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*
Mechanical Properties and Characterization of Phenolic Resin Syntactic Foams, *Sept./Oct., p. 237*

Microcellular Elastomers
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Microspheres
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

Mold Temperature
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Modulus-Density
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*

Nitrogen-Containing Polymers
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

Non-Reactive Retardants
The Role of Silicone Surfactant in Flexible Polyurethane Foams of Low Burn Extent, *July/Aug., p. 186*

Nuclear Magnetic Resonance (NMR) Spectroscopy
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*

Nylon
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

Phenolic Resin Diafoams
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

Phenolic Resin Foams
Mechanical Properties and Characterization of Phenolic Resin Syntactic Foams, *Sept./Oct., p. 237*

Physical Properties
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Pilot Plant
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Poisson's Ratio
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*

Polyacrylonitrile
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

Polyester Diols
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Polyester Pneumacel
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Polymer Polyols
Polymer-Polyols in the Development of High Resiliency Foam, *Nov./Dec., p. 276*

Polymer Variables
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Polyols
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*
Polymer-Polyols in the Development of High Resiliency Foam, *Nov./Dec., p. 276*

Prediction
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept./Oct., p. 230*

Process Range
The Role of Silicone Surfactant in Flexible Polyurethane Foams of Low Burn Extent, *July/Aug., p. 186*

Quasi-Prepolymer
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Rigid Urethane Foam
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*
Urethanes in the Seventies, *Mar./Apr., p. 78*

Ross Flex Test
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Sandwich Foams
The Prediction of the Flexural Rigidity of Sandwich Foam Mouldings, *Sept. /Oct., p. 230*

Shear Modulus
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*

Shock Absorption
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

Shoe Soles
Microcellular Elastomers in Footwear, *Nov./Dec., p. 283*

Shrinkage
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Slabstock Urethane Foam
Advances in Flexible Slabstock Urethane Foam Production Technology, *Sept./Oct., p. 221*

Stress-Strain Behavior
Mechanical Behavior of Foamed Materials Under Dynamic Compression, *May/June, p. 127*
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

Structure
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Structure-Property Relationships
Influence of Polymer Structure on High Resiliency Foams, *July/Aug., p. 171*

Surface Collapse
High Resilience Cold Cure Foam—A Pilot Plant Investigation, *May/June, p. 121*

Syntactic Foams
Mechanical Properties and Characterization of Phenolic Resin Syntactic Foams, *Sept./Oct., p. 237*
Mechanical Properties of Phenolic Resin Diafoams, *Nov./Dec., p. 295*

TCAI Method
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*

Tensile Modulus
The Deformational Behavior of Foamed Thermoplastics, *May/June, p. 135*

Terminal Hydroxyl Ends
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*

Test Correlation
Correlation Between Hardness Tests on Flexible Polyurethane Foam, *Jan./Feb., p. 35*

Testing Machines
Impact Hysteresis and Energy Absorption of Plastic Foams, *Mar./Apr., p. 85*

TFA Method
End Group Analysis of Polyether Polyols by Nuclear Magnetic Resonance (NMR) Spectroscopy, *Jan./Feb., p. 43*

Terminal Expansion
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*

Transportation
Urethanes in the Seventies, *Mar./Apr., p. 78*

Upholstery Cushions
DuPont Polyester Pneumacel for Firm Cushions in Mobile Homes, Modular Homes and Transportation Seating, *Mar./Apr., p. 90*

Urethane Foam
Advances in Flexible Slabstock Urethane Foam Production Technology, *Sept./Oct., p. 221*
Correlation Between Hardness Tests on Flexible Polyurethane Foam, *Jan./Feb., p. 35*
Effects of Chemical Bonds on Some Physical Properties of a Rigid Urethane Foam, *Nov./Dec., p. 301*
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

Urethane Foam, Flexible
Preparation of Elastomer Sheets from Flexible Urethane Foam Formulations, *Jan./Feb., p. 26*

Urethane Foam Production
Advances in Flexible Slabstock Urethane Foam Production Technology, *Sept./Oct., p. 221*

Urethane Historical Development
Urethanes in the Seventies, *Mar./Apr., p. 78*

Wool
HCN Generation from Urethane and Isocyanurate Foams, *July/Aug., p. 181*

Journal of Cellular Plastics
